Uba Chinwoke Promise

Health Data Analyst

Chinwokeuba@gmail.com • +2347066649460 • Ibadan, Nigeria (Available to work remotely)

Nigerian

Education

Obafemi Awolowo University
B.Sc. Microbiology
Health Awareness Volunteer (OAU Community Programmes) Volunteer, OAU Health & Safety Week

Professional Experience

Nigerian Red Cross Society (NYSC) 03/2026 – 06/2026
Community Development Service (CDS) Data Officer Bayelsa, Nigeria

• Cleaned and organized primary community health data for over 1,500 residents using MS Excel and Python, improving reporting accuracy for field health outreach programs by 30%.
• Modeled local disease trends and public health indicators into standardized Excel summary tables, enabling targeted allocation of medical supply distributions.
• Partnered with multidisciplinary teams to present monthly health surveillance data summaries to CDS program directors and community.

AppClick ICT Academy 01/2026
Data Analyst Inter / Trainee Ibadan,Nigeria

• Wrote complex SQL queries involving multi-table JOINs, subqueries, and window functions to extract operational insights from relational databases containing 50,000+ records.
• Built automated Power BI reporting models to visualize operational KPIs, reducing client reporting generation time by 25% through scheduled data refreshes.
• Applied Python Pandas scripts to clean, reshape, and merge multi-source datasets, resolving missing values and structural inconsistencies prior to business intelligence deployment.
• Standardized raw Excel export files into structured database tables using SQL and advanced Excel functions (XLOOKUP, Power Query), eliminating duplicate entries across 15+ metrics logs.
• Delivered structured data visualization presentations to cross-functional stakeholders, translating complex analytical findings into actionable operational recommendations.
• Managed version-controlled code bases on GitHub, ensuring clean documentation and adherence to industry-standard data modeling protocols.

Organisations

Nigerian Red Cross Society (NYSC) Nigeria
CDS Community Health Data Volunteer

Skills

Data Analysis & Scripting: Python, Pandas, NumPy, SQL, MySQL, SQLite, Data Cleaning, ETL Pipelines, Data Modeling, Feature Engineerin
Business Intelligence & Visualization: Power BI, DAX, Interactive Dashboards, Data Storytelling, Streamlit, MS Excel, Advanced Pivot Tables, XLOOKUP
Domain Knowledge: Microbiology, Public Health Analytics, Epidemiological Surveillance, Clinical Supply Chain, Art, Disease Outbreak Modeling
Developer & Workflow Tools: GitHub, Jupyter Notebooks, Git, REST APIs, JSON, CSV?XLS Data Transformations

Summary

Data Analyst with a Microbiology background specializing in Python, SQL, and Power BI to clean complex datasets, build epidemiological pipelines, and deliver actionable public health and operational insights.

Interests

Public Health Tech & Epidemiology — Tracking global disease surveillance methodologies and open-source health data initiative | **Open-Source Data Projects** — Building interactive Python applications and sharing datasets on GitHub

References

Available On Request

Projects

Malaria Proactive Outbreak Early Warning System 01/2026 – Present
Python • Open-Meteo API • Streamlit
⦿ Engineered an API epidemiological warning app in Python to ingest environmental data and forecast vector-borne outbreak risk.
⦿ Built interactive Streamlit dashboards to visualize rainfall, temperature, and disease incidence metrics for regional health decision-making.

HIV Surveillance data & ART Suppply Chain Command Center 01/2026 – Present
Python • SQLite • Streamlit • Pandas
⦿ Developed an interactive web application tracking regional HIV prevalence and antiretroviral treatment (ART) stock levels across primary health centers.

⦿ Built a relational SQLite backend and Streamlit interface to track inventory thresholds, reducing simulated stockout monitoring delays by 35%.

Courses

Professional Data Analytics Training 01/2026 – 11/2026
AppClick ICT Academy Ibadan, Nigeria
Intensive practical training covering python programming (Pandas, NumPy), SQL database querying, Power BI dashboard design, and advanced Excel.
